Please refer to the *Liberty Select Cyclor User's Guide* for detailed information on device description, instructions, contraindications, warnings, and precautions.

The Liberty Select cyclor is intended for acute and chronic peritoneal dialysis. The stay•safe PIN connectors are intended for use with a peritoneal cyclor for drainage and infusion of PD solution during peritoneal dialysis exchanges. The stay•safe PIN connectors are indicated for acute and chronic peritoneal dialysis.

**Caution:** Federal (US) law restricts these devices to sale by or on the order of a physician.

**Note:** Read the Instructions for Use for safe and proper use of these devices. For a complete description of hazards, contraindications, side effects and precautions, see full package labeling at [www.fmcna.com](http://www.fmcna.com).

<b>Setting up the Liberty Select Cyclor for Treatment (Tx)</b>			
1. Locates white power switch on back of machine and sets it to <b>On</b> position			
2. Checks treatment settings on the "Ready" screen			
3. Confirms treatment settings are correct and presses <b>OK</b> to start treatment			
4. Follows the step-by-step on-screen instructions exactly. Presses <b>Next</b> when indicated on each screen			
5. Gathers correct supplies for the treatment per clinic instructions			
6. Puts on mask and ensures that everyone else in the room puts on a mask			
7. Cleans hands thoroughly per clinic procedure			
8. Opens the cassette package with the tubing and removes it from the package. Places the patient line in the stay•safe® organizer.			
9. Verifies that Liberty cassette is free of kinks and damage.			
10. Locates and opens cassette door			
11. Snaps the cassette in place correctly. Does not touch the door sensor when loading the cassette. Closes the door.			
12. Connects the lines to solution bags when prompted to by the cyclor			
13. Places a solution bag on the heater tray in correct position. Follows screen instructions.			
14. Breaks the cones when instructed to do so by the cyclor. Clamps any unused lines.			
15. Verifies the bags are connected per screen indicator			
16. Verifies that only one heater bag is left on the heater tray

Skill Demonstrated	√ Indicates Skill Performed Correctly		
	Simulated	1st Tx	2nd Tx
17. Ensures blue clamp of patient line is open after flush is complete			
18. Ensures the patient line is fully primed. Primes a second time if integrated set is used.			
19. Closes patient line (blue clamp)			
20. Connects the catheter extension set to the PIN connector. Opens patient line (blue clamp) and catheter extension set (white clamp). Removes PIN connector from the stay•safe organizer.			
21. Presses <b>Next</b> to start treatment			
<b>Discontinuing the Liberty Select Cyclor Treatment</b>			
1. Follows the step-by-step on-screen instructions exactly. Presses <b>Next</b> when indicated on each screen.			
2. Turns the blue button on the PIN connector clockwise to unlock, then pushes the blue button to insert the PIN into the catheter extension set. Closes blue clamp on patient line and white clamp on catheter extension set.			
3. Places a new stay•safe cap in the left side of the stay•safe organizer			
4. Inserts the PIN connector that is connected to catheter extension set into the stay•safe clip of the organizer			
5. Removes the protective cover from the new stay•safe cap and sets it aside			
6. Unscrews the catheter extension set from the PIN connector			
7. Connects the catheter extension set to the new stay•safe cap			
8. Removes the catheter extension set from the organizer notch. Makes sure the cap is tight.			
9. Presses the <b>Next</b> button on the cyclor			
10. Closes all clamps on the cyclor set. Removes the cassette from the cyclor and closes the door.			
11. Presses <b>Next</b> to continue			

Skill Demonstrated	√ Indicates Skill Performed Correctly		
	Simulated	1st Tx	2nd Tx
12. Reviews and explains the treatment summary to the nurse			
13. Presses <b>Next</b> to continue			
14. Turns off the cyclor			
15. Cleans the cyclor with (1:100) bleach solution and rinses it off with a water-dampened cloth			
<b>General Machine and Disposables Knowledge</b>			
1. Identifies heater/scale, control panel, door, and On/Off switch			
2. Demonstrates how to handle alarms by pressing <b>Stop</b> to mute, identifying alarm code, and troubleshooting as taught			
3. Can name the four hard key buttons			
4. States the colors of the status bar and what each color indicates			
5. Demonstrates how to check "Treatment Settings"			
6. Demonstrates how to check "My Records"			
7. Demonstrates how to set "Options" for cyclor operation, including SI units			
8. Identifies the color of the cassette line clamps and what each color indicates			
9. Identifies PIN connector on cyclor set and can point to the blue button and PIN			
10. If able, lifts the cyclor properly when moving it			
11. Demonstrates how to accept or reject the settings from the IQdrive™			
12. Demonstrates how to change treatment parameters on the "My Settings" screen			
13. Presses <b>Ok</b> to save changed settings prior to leaving a screen when a change has been made during programming			
14. Differentiates between connected and unconnected lines in the "Verify Bags" screen
